BIG DEAL IN  
OIL PROPERTYControl of Utah-Colorado  
Company Goes to Chicago.

D. C. DUNBAR THE NEGOTIATOR

TEN NEW WELLS WILL BE PUT  
DOWN AT ONCE.

YESTERDAY afternoon there was a great shaking up in the official household of the Utah & Colorado Oil company, caused by the passing of the control into new hands, and the internal discussions that broke out early in the spring are, in consequence, swept away for good.

At that time Messrs. J. R. Lecher, E. W. Wilson, D. B. Shuman and H. O. Shepard held practical control, and Judge D. A. Holmes of Chicago was deposed as president. Then it was that D. C. Dunbar succeeded in getting outside talent interested in the enterprise, and a give or take proposition for the conflicting interests was made. A few days ago the local directors were advised that the board of trustees had taken over their holdings, and when Mr. Dunbar arrived Monday the deal was closed.

Yesterday the men named resigned from the board, and Judge D. A. Holmes was reinstated as president, and the vacancies were filled by electing James A. Patton, mayor of Evansville, Ind.; W. K. Mitchell of the Calumet Grain company; R. E. Doherty, an official of the Lackawanna Railroad company, and S. W. Van Clive, a big Lima, O., oil operator. These, with D. C. Dunbar, George L. Snow, J. W. McCasland and Rock M. Pope, constitute the board as now organized. R. T. Doherty is the new treasurer, and D. C. Dunbar has been installed as secretary.

Speaking of the reorganization after the meeting, Mr. Dunbar said that 50 per cent of the stock was now held by the new crowd, and that a vigorous campaign of development at the company's property would begin at once. It owns 1,200 acres of oil lands on the line between Colorado and Utah, with the great bulk of it in this state. A spring on the property is flowing several barrels a day of a lubricating oil, said to be the equal of the famous Galena cylinder oil, that sells for \$1.00 a gallon. Besides a well has been sunk 600 feet, and three separate strata of oil have been tapped in going that distance.

"It is the intention of the company," said Mr. Dunbar, "to put down ten more shallow wells at once, and continue the first one to the deep. From these different wells we expect to get a big flow in the aggregate, and make good money from them."

The company's headquarters will be established in Chicago and Mr. Dunbar will leave to take charge early next week.

## AT THE BIG SMELTER.

Tonopah Officials Inspect the Plant—  
Manager Jones' Bad Fall.

Early yesterday morning Manager T. R. Jones of the American Smelting and Refining company took the party of eastern Tonopah shareholders down to the magnificent plant that is now preparing to go into commission, and spent a couple of hours showing the features through. They found a number of the hand roasters already at work, while things were being shaped up to light the fires under some of the Bruckner roasters, an event that is scheduled for the latter part of the week. It had been hoped that one of the blast furnaces would be ready to go into commission, also, but some few details will postpone the working at that point till some day next week.

The visitors, however, were fully impressed with the magnitude and completeness of the great works, and enjoyed their inspection immensely. Just before returning to their private car to come back to the city, Manager Jones met with an accident that was painfully distressing to himself, and for the time caused his guests no little uneasiness.

They were crossing the tracks in the smelter yards when Mr. Jones stepped on a piece of pipe that rolled under his feet and pitched him causing him to fall. He fell on his back, and his head struck the ground, and he was badly hurt. He was taken to the hospital, and his wounds dressed. He insisted that he looked worse than he felt, however, and remained at his offices until noon. Then he went home and last evening he was reported as feeling much better. No serious consequences are expected, though, and he will likely be on his feet in a day or two.

## COMSTOCK LOOKING WELL.

Big Ore Chute on 300 Level Apparently  
Close at Hand.

Manager Dusseldorf of the Comstock returned from an inspection of that promising Park City property Monday night. He brought down some of the richest looking rock from the face of the west drift on the 300 level that ever came out of the mine, and Superintendent Hickey now believes that the big ore chute exposed in the surface workings is close at hand.

At the face the vein is now fully seven feet wide, and is filled with white quartz well laden with galena, while the usual strong indications of copper are also apparent. Every foot's headway now being made shows an increase in the metallic contents of the rock, and if another fifty feet does not carry the workings into solid ore all signs, Mr. Dusseldorf declares, will be gone.

In fact, material now being driven into is ore, and while the values are yet too much scattered to call it a shipping proposition, there is no doubt it would pay handsomely to continue that right now. Manager Dusseldorf has never felt so confident over the ultimate outcome of the enterprise as he is today, and he has certainly never before had the showing in the mine that the samples brought down Monday night indicate.

## PETRO WANTS DAMAGES.

Brought Suit Yesterday Against the  
Highland Boy Con. For \$50,000.

It has been an open secret for a good while past that the Petro Mining company had a grievance against the Highland Boy Consolidated, but during the absence of Clarence K. McCormick in Europe the management of the Petro was not inclined to press it, believing that on his return the matter could be straightened out without having to resort to the courts. It appears, however, that no understanding could be reached with Mr. McCormick, who is president of the Highland Boy company, and a suit was yesterday filed in consequence.

In its complaint the Petro company alleges that defendants have entered the Petro claim beneath the surface and extracted ore to the value of \$50,000, and judgment for that amount is demanded.

manded, as well as a perpetual injunction against the alleged trespasser. A temporary restraining order was granted and the defendants were ordered to show cause on June 20 why a permanent injunction should not issue.

From an official of the Petro company it was learned that the defendant corporation, in order to reach a portion of its own territory, has followed a ledge in the Petro for some 400 feet and then turned off at a right angle to run into its own ground. While operating in the Petro it is claimed some good bodies of ore were encountered and that shipments of the ore have been made. What the defendant company's contention is will more than likely be made known on the day set for the order to show cause.

## DAYLIGHT COMPANY RESUMES.

Its Property Adjoining the Hidden  
Treasure Is to Be Made a Shipper.

The Daylight Mining & Milling company has resumed development of its mines adjoining the Hidden Treasure in Dry Canyon, Ophir mining district, Tooele county, and will push the work with a double shift.

It is believed that before the season closes the producer will be added to the list of Utah's paying mines. The treasury is well supplied with money to carry on the work. The mine is under the capable management of J. G. Sawyer.

## Lucky Bill Annual.

The annual meeting of the shareholders of the Lucky Bill Mining company was held in Park City yesterday, and the following board of trustees and officers were elected to serve for the ensuing year: Solon Spiro, president; Louis E. Bamberger, vice president; Simon Bamberger, treasurer; J. B. Bess, secretary; and J. A. A. Holmes, J. D. Pierson and Lee G. Randolph completing the board. No other business was transacted.

## Ore and Bullion.

Ore and bullion shipments in this city yesterday, as reported through the banking house of McCormick & Co., amounted to \$92,600, as follows:

Silver, lead, gold and copper ores, \$85,000; base bullion, \$18,200; cyanides, \$5,400.

## Metal Market.

Silver, 51 1/2¢ per ounce.  
Copper, 11 1/2¢ per pound; New York, 12 1/2¢.  
Lead, \$3.50 per 100 pounds; New York, \$4.12 1/2.

## MINING STOCK EXCHANGE.

Trading Is Still Light and Prices  
Continue to Sag.

Business on change still continues very light, and with the exception of a few three stocks, prices continue to sag and tremble in the balance of an unimproving way. The total sales yesterday amounted to 2,250 shares, for which \$18,650.55 was paid, the afternoon calls representing 12,555 shares and \$735,131 only.

The wind-up found Century selling at 2 1/2, California at 10 1/2 and H. C. Mammoth at 1 1/2. The American Smelting and Refining, Consolidated, Morenci and Daly-Watson both held up well, as did also Ajax, Sacramento and one or two others, while the rest of the list showed no signs whatever of improvement.

The day closed on the following record of final quotations and sales:

## Mining Notes.

J. W. Langley, well known broker, returned from his cattle-buying trip to Oregon yesterday morning.

Stocks from the Lucky Boy and a car of concentrates from the Neptune were reported from Bingham yesterday.

Stocks from the Neptune were reported from Bingham yesterday.

## Six Cars of Yankee Consolidated

landed at the Conklin sampling works yesterday morning, and the lot will be on the market today.

The Hidden Treasure of Dry Canyon, which is now sending about 300 tons of ore per month to market, reported again yesterday, this time with five cars.

The Taylor & Brunton sampler was yesterday in receipt of fourteen cars of ore from Stockton, from Dry Canyon, two from Tintie and two from Bingham.

D. E. Carse, a well known geologist and expert on the mine with a crew of drillers and a fine rig with which to prospect the company's lands near Price. He was selected the site at which to begin yesterday.

Manager McKeetchem of the New York Utah Oil company has just arrived from the mine with a crew of drillers and a fine rig with which to prospect the company's lands near Price. He was selected the site at which to begin yesterday.

William Hatfield of the Albion left for Alaska yesterday morning to watch the installation of the new compressor plant that arrived on the ground ahead of him. Mr. Hatfield will spend the greater portion of his time at the property during the summer.

A number of Detroit shareholders in the Ophir company came to Salt Lake to attend the annual meeting, scheduled for tomorrow. In the party were Hamilton Carhart, Dr. E. T. Tupper, F. W. Whitney and Frank G. Andrews. All but the latter accompanied Manager Lathrop to the mine.

The two cars of ore recently marketed by the Grand Gulch company cut pretty close to the mine with a crew of drillers and a fine rig with which to prospect the company's lands near Price. He was selected the site at which to begin yesterday.

William M. Curtiss, owner of the Glenoco property at Park City, came down from camp Monday night to look at the prospecting of the ground and blocking out of ore bodies already developed.

These days he will have things in shape for steady production. The Hatch company, with (technical) assistance from Mr. Curtiss, is also steadily opening up its mine.

## CROPS IN GOOD SHAPE

Outlook For a Good Corn and  
Wheat Yield Promising.

Washington, June 10.—The weather bureau's weekly summary of crop conditions says:

The temperature conditions were generally favorable in the district east of the Rocky mountains and also in the middle and south Pacific coast regions. The states of the lower Missouri valley have again suffered from excessive rains.

Corn has made good growth throughout the central valleys, but is much in need of cultivation in the states of the lower Missouri valley. In the central and west Gulf states the crop is suffering much from drought.

With the exception of rust in portions of Missouri and Indiana, a general improvement in the condition of winter wheat is indicated. Harvesting has begun as far north as North Carolina, Tennessee and the southern portions of Missouri and Kansas, but is progressing under difficulties from heavy rains in the last named state.

On the Pacific coast the wheat outlook continues promising, although grasshoppers are causing some trouble in the Sacramento and San Joaquin valleys.

Spring wheat has made a rapid growth and is in good condition except in low lands, where it has suffered from moisture. The fruit outlook continues favorable, the most promising reports being received from the lake region and the western portion of the middle Atlantic states and New England.

## EXPENSES EXCEED RECEIPTS.

Boer War Will Cause Deficit in the  
British Treasury.

London, June 10.—A parliamentary paper issued today presents the revised statement of the Boer war, and it is estimated that the expenditure will total £178,358,000, and that revenue will amount to £152,450,000.

The deficit will be met out of the proceeds of the Boer war, £23,200,000, leaving £5,058,000 available for contingencies and the redemption of part of the national debt.

## COST OF FOOD.

Grape-Nuts vs. White Bread, etc.

A family figured carefully on the cost of food, taking into consideration the strength and health that Grape-Nuts furnished. The report is interesting.

"We first took up Grape-Nuts because it agreed with me so well. I was suffering from dyspepsia that medicine failed to cure. I frequently laughed at the idea when some of my friends told of the use of Grape-Nuts; however, one day wife bought a package and we found it good, and it agreed with me."

"We were accustomed to using white bread and oats, wheat or barley mushes boiled from two to four hours. We considered Grape-Nuts too expensive, but I noticed that when I had a breakfast of Grape-Nuts I felt fine, and other days, when while bread and other cereals were used, I felt weak and bloated."

"One day, about six months ago, I said to wife: 'I am satisfied that Grape-Nuts is the thing that makes me feel better in the blue spells.' Then we set down and figured a while on the cost of living, and came to the conclusion that we could live better and happier on 15 cents' worth of Grape-Nuts than on 25 cents' worth of white bread or 'cooked at home' cereals. You see four teaspoonfuls of Grape-Nuts furnish more strength to work than large quantities of other food, so we started on Grape-Nuts in earnest, using it every morning, and a wonderful change has come over me."

"I am gaining in weight every day. Never have any of the old bloated feelings. Feel strong and well, and can endure more hard work than I could on the old diet, and this result is all without any doctor or drugs at all, but directly from using Grape-Nuts." Name given by Postum Co., Battle Creek, Mich.

Recipes for many easy hot weather dishes in each package of Grape-Nuts.

## PRICES HIGHER

Market, However, Was Very Dull  
and Narrow.

## TRADERS ARE OPTIMISTIC

EXPECTATION OF COAL STRIKE  
SETTLEMENT.

New York, June 10.—There was some improvement in the demand for stocks today and upward progress was made by prices, but the market was dull and narrow to a degree that was not unusual for the last two years within a week.

Dealings continued almost entirely in the hands of professional traders, but this element operated with more freedom than for several days. They were encouraged by the fact that the coal strike was settled.

Some of the aggregate dealings, however, were concentrated buying of Southern Railway, which easily led the whole market in point of activity. A single commission house often employed by one of the large financial interests was credited with buying 10,000 shares of the stock. There was a general expectation that the monthly crop estimate of the
